

Had it with Dentures?

Have you had it with:

- Loose, embarrassing dentures
- Gobs of denture adhesive
- Gagging uncontrollably
- Loss of taste
- Loss of bone
- Bulky denture plastic

If dentures are making eating a chore and changing your appearance...

If you are self conscious and embarrassed about wearing dentures...

If you worry about your teeth falling out...

If denture wearing affects your employment or social life...

Then why waste your money on a new set of old fashioned dentures?

Consider **implant** treatment for teeth that are firmly and securely attached.

Implant teeth that feel like real teeth. **Implant** teeth that can chew better.

Implant teeth that don't fall out. **Implant** teeth that give you confidence.

Eating can be wonderful again!!!
